

Masévon statement on REACH compliance

At Masévon Group B.V., we acknowledge our responsibility to protect the natural environment and human health by ensuring that chemicals used in our products are managed safely and responsibly. To support this commitment, we comply with the European Union's Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) Regulation, which governs the safe use of chemical substances throughout the supply chain.

Our products and/or processes may include chemical substances or preparations, sometimes prescribed by or selected in collaboration with our customers. To maintain compliance and uphold sustainability standards, Masévon Group B.V. requires all suppliers to meet REACH obligations as part of our General Terms of Purchase. This includes ensuring that substances are registered, evaluated, and authorized where necessary, and that restricted substances are avoided.

In cases of uncertainty regarding REACH compliance, Masévon Group B.V. will request formal declarations or supporting documentation from suppliers to confirm adherence to the regulation. This approach ensures transparency and reinforces our commitment to environmental stewardship.

The REACH Regulation currently in force is [Regulation \(EC\) No 1907/2006](#) which aims to protect human health and the environment from risks posed by chemicals, while promoting innovation and competitiveness in the EU chemicals industry.

Masévon Group B.V.'s compliance is based on information provided by suppliers and verified through reasonable due diligence. While we take every measure to ensure accuracy, we will actively follow up on any uncertainties to maintain compliance and uphold our environmental responsibility.
